

Manjunathareddy Kummathi

Anantapur, Andhra Pradesh | +91 8464001960 | manjukummathi@gmail.com | linkedin.com/in/Manjunathareddy-Kummathi | github.com/Manjunathareddy23

PROFESSIONAL SUMMARY

Computer Science undergraduate with 4 internships spanning Full Stack Development, Generative AI, and Data Analytics. Built and deployed production applications used by 1,000+ users; integrated LLMs to cut manual workflows by up to 90%. Skilled across the full stack: Python, JavaScript, ReactJS, Streamlit, Flask, REST APIs, SQL, and AI/ML integration. Hackathon winner with a consistent track record of shipping working products under tight deadlines.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript (working knowledge), Java, C

Frontend: ReactJS (hooks, Context API, useReducer), HTML5, CSS3, Responsive Design

Backend & APIs: REST APIs, Streamlit, Flask, JSON, Axios

AI & ML: LLM Fine-tuning, Prompt Engineering (chain-of-thought, few-shot), NLP, OpenAI GPT-4, Gemini API, Scikit-learn, Pandas, NumPy

Data & BI: Power BI (DAX), Excel, Matplotlib, ETL pipelines

Databases: MySQL — joins, aggregations, subqueries, window functions

Tools: Git, GitHub, Linux, VS Code, Render, Streamlit Cloud, Chrome DevTools

EXPERIENCE

ReactJS Intern — Pumo Technovation

Chennai, India | Aug 2025 – Jan 2026

- Built 10+ reusable ReactJS components with Context API and useReducer state management for a CRM platform serving 1,000+ users; improved component reuse by ~30% and cut bug-related rework through systematic Chrome DevTools debugging.
- Delivered responsive, mobile-first UIs in a 5-person agile team across 3 sprint cycles; delivered all assigned features on schedule with zero critical regressions shipped to production.

Generative AI Intern — Sure Trust

Anantapur, India | Jan 2025 – Jun 2025

- Designed and deployed AI-powered applications (Python + Streamlit) integrating OpenAI GPT-4 and Gemini APIs, serving 100+ users with NLP and generative AI features including summarisation, translation, and content generation.
- Fine-tuned LLMs and applied chain-of-thought prompting; improved response relevance by ~15% over zero-shot baselines measured on 50+ structured evaluation sessions.
- Replaced manual weekly deployments with Streamlit Community Cloud auto-deploy on GitHub push; reduced release cycle time by ~30% enabling same-day production updates.

Data Analytics Intern — Edunet Foundation

Chennai, India | Nov 2024 – Dec 2024

- Built 4 Power BI dashboards for 50+ stakeholders; designed Python + SQL ETL pipelines reducing data processing time by ~40%; validated 10,000+ records for quality and consistency.

Python Developer Intern — Value Laden

Hyderabad, India | Feb 2024 – Apr 2024

- Optimised Python automation scripts and refactored legacy code across 5+ modules; reduced manual workload by ~25% and improved application response time by ~20%.

PROJECTS

ATS Resume Reviewer — Python · Streamlit · OpenAI API · NLP · Render

2025 | github.com/Manjunathareddy23/ats-resume-reviewer | Winner — Hack with Nellore Hackathon 2024

- Full-stack AI application generating ATS compatibility scores, keyword gap reports, and HR interview questions; NLP pipeline using TF-IDF and Gemini API achieved ~85% keyword-matching accuracy on 50+ labelled test cases.
- Deployed on Render with GitHub-triggered auto-deploy; processes a complete resume analysis in under 8 seconds. Reduced manual screening time by ~90%.

Cover Letter Generator — Python · Flask · OpenAI GPT-4 · Prompt Engineering

2025 | github.com/Manjunathareddy23/cover-letter-gen

- Flask web application generating personalised, role-specific cover letters from resume + job description input using structured GPT-4 prompts with role, tone, and keyword injection.
- Designed a 3-stage prompt pipeline (extract → reframe → compose) using chain-of-thought prompting; reduced manual writing time by ~70% in user testing with 15 job seekers.
- Built REST API backend in Flask with JSON request/response handling; frontend in HTML/CSS/JS with real-time letter preview and one-click copy-to-clipboard.

AP-EAMCET Rank Predictor — Python · Pandas · Scikit-learn

2025 | github.com/Manjunathareddy23/eamcet-rank-predictor

- Regression model on 5+ years of historical EAMCET data; engineered 8 features, applied 5-fold cross-validation, evaluated with RMSE/MAE — prediction error within ± 200 ranks on test set.

EDUCATION

B.Tech in Computer Science & Engineering — Audisankara College of Engineering & Technology

Gudur, Andhra Pradesh | 2022 – 2026 | CGPA: 8.83 / 10.0

ACHIEVEMENTS

- Best Performance — Hack with Nellore Hackathon 2024 (AI-Powered ATS Resume Reviewer)
- Winner — Summer Contest 2023 for innovative project execution
- Two-time Runner-up — College Hackathons (2022, 2023)
- Qualified HCL TechBee 2022 national-level engineering programme

CERTIFICATIONS

- Python for Data Science — IBM | SQL & Relational Databases — IBM
- AI & Business Intelligence Analyst — NSDC | Artificial Intelligence — Simplilearn
- Front End Web Development — W3Cx (edX) | Data Analytics — Accenture
